

Vasilcan Darius

Business Informatics Student
& AI-Augmented Developer

ABOUT ME

Second-year **Business Informatics** student at UBB FSEGA, focused on translating business requirements into robust software solutions. I combine a solid foundation in **OOP principles** with modern **AI-augmented workflows** to architect clean, fast, and efficient applications.

Education

UBB CLUJ - FACULTY OF ECONOMICS
AND BUSINESS ADMINISTRATION

• Bachelor in Economic Informatics
(2024-2027) • Currently 2nd Year

INDEPENDENT PROJECTS

SNAKE GAME

(Java OOP)

- **OOP Architecture:** Built the game entirely from scratch, demonstrating mastery of core Java concepts and structured logic.
- Applied Principles: Implemented robust systems using **Encapsulation** for entity states, **Inheritance** for game objects, and **Polymorphism** for dynamic action execution.
- Game Mechanics: Successfully managed collision detection, the graphical rendering system, and the main game loop.

FORGE (FITNESS TRACKER)

(TypeScript, CSS, JavaScript) • AI-Augmented Development

- Modular Architecture: A web platform dedicated to workout monitoring, built as a solution to a clear market need.
- **Vibe Coding & AI:** Acted as **Lead Developer** and **Prompt Engineer**, orchestrating code generation through **LLM** integration to rapidly assemble functional modules and deliver real utility.

Language

- Romanian - Native
- English - Intermediate

Skills

- Java (OOP)
- SQL & Relational DBs
- HTML & CSS
- Linux CLI (Ubuntu)
- Virtual Machines Config
- Prompt Engineering
- Business Analysis
- Product Strategy

COMPETENCIES

- Problem-Solving
- Discipline
- Team Collaboration
- Attention to Detail
- Growth Mindset

BUSINESS STRATEGY INTERN | I-LAB INCUBATOR (UBB)

(October 2025 – December 2025)

- Market Validation: Analyzed the business idea proposed by the **tech team**, leading the **Market Research** process to validate the viability of the educational app "Classlly" among students.
- Business Strategy: Contributed to structuring the **business model**, refining the value proposition to ensure a solid **Product-Market** Fit prior to final prototype development.
- Technical Alignment: Collaborated directly with the developer, providing strategic insights and **user feedback** to guide and refine product features.

ACADEMIC PROJECTS

RELATIONAL DATABASE DESIGN (SQL, ERD Tools)

- Designed a relational schema (ERD Diagrams) and wrote SQL scripts for table generation and data integrity.

VIRTUALIZED NETWORK CONFIGURATION (Ubuntu CLI, Windows Server)

- Configured an isolated environment of 3 virtual machines and administered the Linux OS exclusively via the Command Line Interface (CLI).
