

# Vasilcan Darius

Business Informatics Student  
& AI-Augmented Developer

## ABOUT ME

Second-year **Business Informatics** student at UBB FSEGA, focused on translating business requirements into robust software solutions. I combine a solid foundation in **OOP principles** with modern **AI-augmented workflows** to architect clean, fast, and efficient applications.

## Education

UBB CLUJ - FACULTY OF ECONOMICS  
AND BUSINESS ADMINISTRATION

• Bachelor in Economic Informatics  
(2024-2027) • Currently 2<sup>nd</sup> Year

## EXPERIENCE

### SOFTWARE DEVELOPMENT INTERN | VANADIGITAL (June 2026 – Present)

- **Project Development:** Engineered "ScopeGuard," a custom SaaS CRM for digital agencies using Vanilla JS and MVC architecture.
- **UI/UX & AI:** Rapidly prototyped a responsive Tailwind CSS interface leveraging AI-assisted workflows (Prompt Engineering).
- **Backend & Security:** Integrated Supabase (BaaS) and implemented Row Level Security (RLS) for strict data privacy.
- **Deployment:** Managed the deployment pipeline via Git and Vercel.

### BUSINESS STRATEGY INTERN | I-LAB INCUBATOR (UBB) (October 2025 – December 2025)

- **Market Validation:** Led market research to validate the "Classlly" educational app concept among target students.
- **Business Strategy:** Refined the business model and value proposition to achieve a solid Product-Market Fit.
- **Product Alignment:** Collaborated with the tech team to guide feature development based on user feedback.

## Language

- Romanian - Native
- English - Intermediate

## Skills

- JavaScript (Vanilla JS)
- Tailwind CSS
- Java (OOP)
- SQL & Relational DBs
- HTML & CSS
- Supabase (BaaS)
- Prompt Engineering
- Business Analysis
- Product Strategy
- Virtual Machines Config

## COMPETENCIES

- Problem-Solving
- Discipline
- Team Collaboration
- Attention to Detail
- Growth Mindset

## INDEPENDENT PROJECTS

### FORGE (FITNESS TRACKER)

(TypeScript, CSS, JavaScript) • AI-Augmented Development

- **Modular Architecture:** A web platform dedicated to workout monitoring, built as a solution to a clear market need.
- **Vibe Coding & AI:** Acted as **Lead Developer** and **Prompt Engineer**, orchestrating code generation through **LLM** integration to rapidly assemble functional modules and deliver real utility.

### SNAKE GAME

(Java OOP)

- **OOP Architecture:** Built from scratch, applying core Java principles (**Encapsulation, Inheritance, Polymorphism**).
- **Game Mechanics:** Managed collision detection, rendering system, and the main game loop.
